For Airway Success

Airway Interventions & Management in Emergencies

AIME On-the-Road

A Hands-on, Case-based, Practical Airway Learning Experience

AIME CAEP Roadshow: This program is designed for physicians working in an acute care setting requiring them to competently manage patients in need of emergency airway management.

AIME educators are experienced (and entertaining) clinical instructors who understand the varied work environments of practicing clinicians. You will not be taught industry representatives. Whether you work in a large, high volume center or a small remote setting, AIME will provide a practical approach for airway management in emergencies.

Course Highlights:

- Case-based clinical decision making
- **NEW** algorithms based on Canadian Airway Focused Group Guidelines
- **NEW** managing patients with high risk infections
- Optimizing your patient prior to airway management
- Hyperangulated, Macintosh and channelled video laryngoscopy
- Managing the contaminated airway
- When, why and how to perform awake or rapid sequence intubation
- Management of the difficult airway and rescue oxygenation and ventilation
- How to make the decision and safely execute a cricothyrotomy
- On-line open access textbook (aimeairway.ca/book)
- Unique, customized clinical videos
- Limited registration to ensure clinician to instructor ratio of 5 or 6:1
- Clinician to simulator ratios of 2:1

AIME Training®

Program Objectives: Attendees will...

1. Be more confident and comfortable in making acute care airway management decisions.
2. Have acquired a practical staged approach to airway management.
3. Be able to choose the most appropriate method of airway management based on a variety of patient presentations.
4. Make appropriate choices in the use of pharmacologic agents used to facilitate airway management.
5. Learn how to optimize patients prior to airway management.
6. Know when and how to use various tools and adjuncts for managing the difficult airway.

Program Day:

0730-0800 Registration/Coffee

0800-0820 Introduction

0820-0840 Airway decisions & optimizing patients in need of intubation

0840-0920 *Workshop 1: Pre-oxygenation techniques*

0920-0950 Airway assessment

0950-1000 Coffee

1000-1115 *Workshop 2: Macintosh and Hyperangulated VL*

1115-1200 Airway decisions- Awake vs RSI

1200-1230 Lunch (provided on-sight)

1230-1315 Approach to the difficult airway

1315-1445 *Workshop 3: Awake intubation, the contaminated airway, Advanced VL and Bougie assisted cricothyrotomy*

1445-1545 *Workshop 4: Case Discussions/Coffee*

1545-1730 *Workshop 5: Case scenarios- Putting it all together*

1730-1745 Wrap-up/Evaluation
